Baseline-compensated STP: input scale 0.1 versus 1.0
Same reservoir seed 12346, leak 0.6, bias 0 · washout 0–500, training 500–2000, test 2000–2500
Input scale 0.1 (MC 0.567)
Input scale 1.0 (MC 0.134)
Effective spectral radius
Mean absolute effective weight (nonzero edges)
Simulation step
Dashed lines show the initial unscaled values. Samples are 100 steps apart.
